

## YEG ESSENTIALS, 2017

- **Critical review** by an appropriate person
- Submit entire paper in **digital format** to editors
- **Figure captions** are to be listed at the end of the document
- **Figures/tables/photos** are to be submitted as individual files
- A **List of headings** is to be provided; sections are to be identified using indentation to show hierarchy

### **Text**

All measurements should be provided in metric units, although standard units may also be included.

All formatting or imbedded referencing should be removed.

### **Figures**

Do not embed figures in the text file.

Figures no larger than 8.5 X 11 page size.

Adobe Illustrator is preferred. If your figures are in another format, let us know as soon as possible so we can see if it can be used.

Graphs need separate file with raw numbers upon which they are based.

### **Photos**

Photos scanned (200-300 dpi) in colour as RGB.

Do not add lettering to photos. Indicate these on a pdf and we will add them to the digital image.

Scales for all photos/photomicrographs can be in figure caption, e.g., "Clast is 4 mm across."

### **Maps**

Reasonable level of complexity - features must be readable.

Maps and cross sections must have scale, north arrow, latitude/longitude or UTM coordinates (with NAD designation).

### **References**

Only cite work that is, or will eventually be available to the public. Make sure all information that is not common knowledge is referenced.

### **Abstract**

150 words or less.

**Manuscript Deadline:** November 30, 2017

Following submittal of manuscript, authors must make themselves available to thoroughly review editorial comments, suggestions and questions over the successive weeks. Authors must make appropriate changes before resubmitting to the editors.
